# **B3 Series, 3-Way, Characterized Control Valve Chrome Plated Brass Ball and Brass Stem**

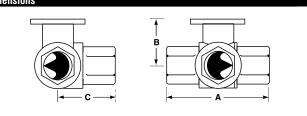

## Application

This valve is typically used in air handling units on heating or cooling coils, and fan coil unit heating or cooling coils. Some other common applications include Unit Ventilators, VAV box re-heat coils and bypass loops. This valve is suitable for use in a hydronic system with variable or constant flow.

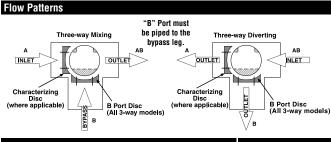

| Technical Data          |  |  |  |  |
|-------------------------|--|--|--|--|
| Service                 | chilled or hot water, 60% glycol         |  |  |  |
| Flow characteristic     | A-port equal percentage                  |  |  |  |
|                         | B-port modified for constant common port |  |  |  |
|                         | flow                                     |  |  |  |
| Action                  | 90° rotation                             |  |  |  |
| Sizes                   | 1/2", 3/4"                               |  |  |  |
| Type of end fitting     | NPT female ends                          |  |  |  |
| Materials:              |  |  |  |  |
| Body                    | forged brass, nickel plated              |  |  |  |
| Ball                    | chrome plated brass                      |  |  |  |
| Stem                    | nickel plated brass                      |  |  |  |
| Seats                   | PTFE                                     |  |  |  |
